

**TRU GUARD - PROTECTING WHAT'S IMPORTANT**

**TruGuard<sup>®</sup>**  
**RAINWARE SYSTEM**

# PROTECTS

**NOTHING PROTECTS YOUR GUTTERS LIKE TRUGUARD!**

## **True Ease**

Cleaning out your gutters is a messy job, to say the least. Scooping out the rotten debris is a time-consuming and filthy job. But TruGuard makes it truly easy to keep your gutters clean, year after year!

## **True Joy**

TruGuard lets you enjoy your summer, without worrying about mosquitoes in your gutters.

The water that sits in your gutters is an ideal breeding ground for mosquitoes... insects that not only bite, but can carry serious diseases. Clear your gutters of debris and mosquitoes with TruGuard!

## **True Friend**

Like a true friend, TruGuard takes care of your gutters for you. It eliminates the need to climb a ladder to clean out your gutters so you don't have to risk a fall or injury. TruGuard works non-stop! It lets rainwater in and keeps out debris to keep your gutters clean year-round!

# PROFESSIONALS

TRU GUARD IS INSTALLED ONLY BY TRUE PROFESSIONALS

TruGuard is the sign of a true Professional. Here's why:

You can count on a highly qualified team, with extensive training in roof construction, hydrophysics and the TruGuard product design.

Prior to installation, the TruGuard team will clean and repair your gutters.

# INVESTMENT

## HOW YOUR GUTTERS HELP PROTECT YOUR HOME INVESTMENT

Gutters (or eaves troughs) are part of your home's rainwater management system. They help to channel water away from the house to prevent water damage. Your gutters help to prevent a number of problems including: mold growth, deck and foundation damage, landscape destruction and infestations of termites, mosquitoes and rodents.

When leaves and other debris fall into your gutters and collect, they can clog your gutters and stop them from working properly. They get plugged with rotting material – sometimes plants even sprout up. Water that can't run off just sits to attract mosquitoes.

That's why keeping your gutters clean is so important!

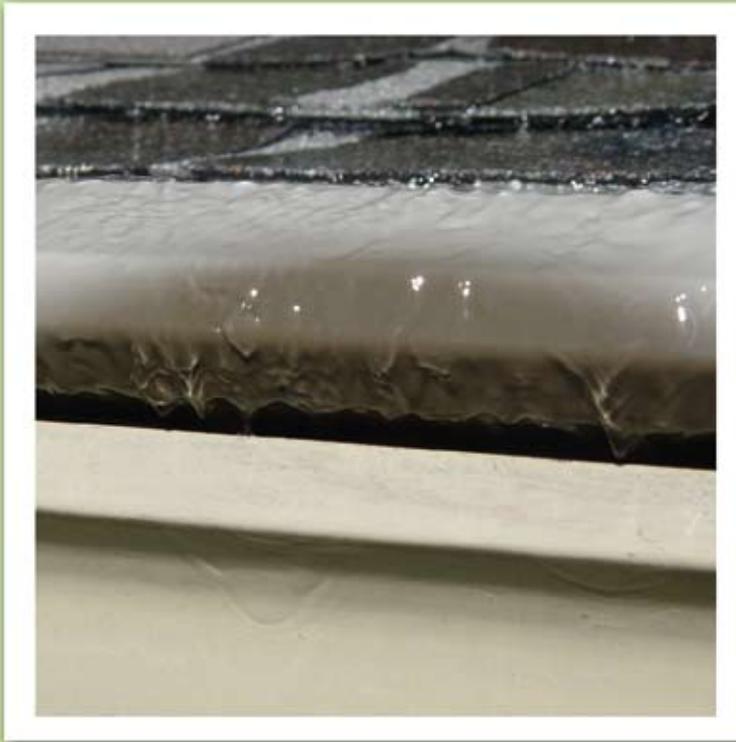

# TRU GUARD

TRU GUARD - A STROKE OF TRUE GENIUS

TruGuard lets gutters do what they do best: drain water. Even during heavy downpours, water is easily channeled into the gutter while the nose-forward design of TruGuard stops any other debris from coming into the gutter.

TruGuard takes advantage of surface tension – the same factor that allows water to rise above the rim of a glass. The surface tension of water allows it to follow the contours of TruGuard into the gutter, while debris simply falls to the ground.

## How Can TruGuard Help?

Once your installation team has cleaned out your gutters and done any needed repairs, TruGuard attaches securely to your gutters as permanent protection. TruGuard allows rainwater to flow through while repelling leaves, sticks, debris, balls, frisbees... and anything else that can get caught in your gutters.

1. Our high performance alloy and special ceramic pigment adds beauty, protects from the sun's harsh rays, and reduces the threat of tree branches or other objects damaging your gutters.

2. TruGuard does not penetrate the roof shingles – it is anchored through the fascia of the roof.

3. The nose-forward design lets rainwater flow through, as it blocks out debris.

4. The “Smart Clip™” attachment brackets provide a stronger connection than the competition.

The clip's external angle works with patented G-Force Technology to ensure water is routed into the gutter and debris is kept out.

# PERFORMANCE

**A TRUE CHAMPION FOR LASTING PERFORMANCE**

**Find out how Tru Guard can protect your home investment...  
and make your summer worry-free!**

Tru Guard is designed and built to last a lifetime.  
Have it installed on your home today!

## **Tru Guard makes sure:**

- Leaves and other natural debris won't enter your gutter.
- Termite and mosquito infestations in your gutter are eliminated.
- Balls and Frisbees from neighborhood kids won't get stuck in your gutter.
- You won't have to scoop rotting debris out of your gutter.
- You won't have to worry about the risk of climbing a ladder to clean your gutter.

# CUSTOMERS
